ORGANIZATION

OF THE

CITY GOVERNMENT, JANUARY 7, 1918.

The meeting was called to order in the Opera House at 8 o'clock in the evening. The oath of office was administered by City Clerk Goss to Mayor-elect Edward G. Leach and Councilmen-elect Thomas L. Riley of Ward One, Do-cite J. Rousseau and Henry J. Roulx of Ward Two, and William S. Stewart of Ward Three.

Prayer was offered by Rev. Henry C. McDougall.

Mayor Leach gave the following address:

Mayor Leach's Inaugural.

Forty-six years ago last September I established my home in Franklin and have since continued it here, having taken part in every election during that time. During about thirty years of this time I have conducted the principal part of my business in Concord, going and returning daily.

Although urged and advised several times to remove my residence to Concord, I never seriously considered the matter and always replied I preferred to live in Franklin. Such has been my feeling toward Franklin since I first located here, and today there is no place so dear to me or that I would exchange as a place to live in.

Probably my regard for my home city is partly due to the generous patronage her citizens have given me in a business way and the confidence in me displayed by you when I have asked for your support for public office or any public cause.

I hope you will not consider it inappropriate at this time for me to return to you not only my heartfelt thanks

for the confidence manifested by you in electing me by a non partisan nomination and vote to the office of Mayor of this city but to also return to you thanks for the generous support you have heretofore given me as a candidate for County Solicitor two terms, Representative two terms, member of the Constitutional Convention, Senator and member of the Governor's Council and City Solicitor for fourteen years. I cannot help thinking that your non partisan endorsement for this office may be considered by me as an expression that I tried at least to represent you faithfully in these prior offices so that I can assure you that none of the honors conferred on me before this are prized by me so much as this, your latest evidence of confidence.

We have now completed twenty-three years under the city form of government so that half of my residence in Franklin has been under the present form of government and half under the old town form of government. Having been active with others in drafting the present city charter, in securing its passage into law as your representative in the Legislature, and in securing its adoption by vote of the city it may be of interest to the younger generation at least to recall the reasons that led the people to change from the town to the city form of government in 1894 when the town had only a population of about 5000, also to consider whether the change then made was a wise one.

From 1871 to 1893 the town was mainly controlled by one political party; both parties having able men of prominence throughout the state to such an extent that one of our citizens was elected a member of Congress, another a United States Senator, another Attorney General of the State, another Judge of the Supreme Court, another Railroad Commissioner, and two other aspirants for a seat as Congressmen. These men were among the leaders in the Councils of both parties and anxious to make a good showing in their home town.

The open ballot was in use in town meetings until 1893 when the secret ballot law was enacted. Under the open ballot representatives from both parties stood near the polls and doubtful voters who desired a reward of some kind were obliged to show their ballot before voting in or-

der to obtain it. This resulted in the use of money in nearly every election, the amount gradually increasing until in one election, at least, over \$5000 was expended. It also grew to such proportions that there were about 300 voters who wouldn't vote without compensation including men worth \$5000 to \$10,000. A few men made it a business to handle these floaters and had such control over them they were able largely to control their votes in town meetings on other questions besides the election of officers.

The floaters were always in attendance in full force and often controlled the decision of important questions. The town then had about 1200 voters, about 25 per cent being floaters whose power and organization was increasing.

To improve these conditions was one reason for the city charter. By making one ward strongly Republican and another strongly Democratic and a third doubtful, the floaters to a large degree were deprived of their power.

Another reason for the change was that under the charter the city was given five representatives to the Legislature where under the town system it had but three. The gain was made because the law gave to wards of cities the same right of representation as towns and only half the population was required for the first representative as for each additional one.

Another reason was that it was believed the interests of the people were safer in a council composed of a mayor and nine men chosen from three separate constituencies two-thirds of whom would hold over and be familiar with the city's business of the prior year, than in the hands of a town meeting such as I have described.

Another reason was the hope and belief that there would be less partisanship in the appointments to office and in the conduct of city affairs in the Council than in the Board of Selectmen whose appointments had been largely made from the party to which a majority of the Selectmen belonged.

Have the results of the last twenty-three years justified the change? I think they have. The floater has almost, if not quite, become a thing of the past. We have had the additional representation to which we were entitled and many good men have served the city well, who never could or would have under the old town system. The average

Mayor and Councilmen have been superior in capacity and judgment to the average Selectmen of former days. Partisanship has been largely, if not wholly, eliminated from the acts of the City Council. The fact that no material amendment to the charter has ever been made and no attempt to return to the old form of government justifies the conclusion that the people have been satisfied with the change.

The fact that the people have been satisfied with the past will not relieve us from our duty to improve conditions so far as we can. Our constant aim should be to make Franklin a better place to live in by conducting the business of managing its affairs as we would our private business with prudence and economy. The need of economy and patriotism were never greater than now. We are engaged in a world war to make the world safe for Democracy. Let us not forget or fail to honor in every practical way our fellow citizens, sons and friends who have gone and are in the future to go into our country's service. Let them be assured that their sacrifices and patriotism are and will be appreciated and that they and their dependents who are left behind shall not want for any reasonable assistance we can render. I recommend that a Roll of Honor be kept by the City Clerk in a book kept solely for that purpose of those who have and may enter the country's service during this war, with suitable description of their service; that this list be published in the 1918 City Report; that after the war it be further perpetuated by a marble tablet in the City Hall Building; that their taxes be abated during the war; and that suitable appropriation be made or a fund raised to render aid that may be needed by them or their dependents. I also suggest a hope that the Grand Army may so revise their constitution, if necessary so to do, in order to take them into membership or that some arrangement be made so that they can occupy jointly with the Grand Army their hall for a separate organization.

Home Protection.

While it is not probable that we shall suffer from an attack by our enemies locally such an event is not impossible, especially from aerial attacks. A more serious danger exists from persons in sympathy with our enemies and from alien enemies in disguise who may secretly cause damage that may hinder and delay our war preparations. We have an efficient company of Home Guards who are doing good service but all good citizens should share in watchfulness and in reporting to the City Marshal or the Mayor any information regarding persons suspected by them of disloyalty.

City Finances.

The city's debt since the first year of city government in 1895 has varied as follows:

1895, debt,	\$167,389
1904, debt,	141,754
1910, debt,	224,793
1917, debt,	232,455

showing a reduction during the first nine years of about \$25,000 and an increase in the last thirteen years of about \$90,000 or an increase in the last seven years of about \$8,000. The increase in debt has been due in the past to following expenditures:

Improvement of business section, Central St.,	\$36,000
Purchase Odell Park and addition to City Hall lot,	9,500
Additional Construction for Water Works,	40,000
Sewer estimated,	30,000
	<hr/>
	\$115,500

In addition I estimate we have expended an average of over \$5000 per year since 1905 on construction of improved state roads, mostly macadam. This is in addition to the annual appropriation for other highways. This has given us about fifteen miles of first class modern highways at a cost of not less than \$60,000 so that while we have increased our debt \$90,000 in 13 years, we have expended about double that amount in permanent improve-

ments. Since 1895 our growth has shown an increase in number of Polls from 1231 to 1897 an increase of about 50 per cent, in valuation from \$2,415,286 to \$5,170,030 or over 100 per cent. During the same time our taxes have increased from \$41,000 to about \$90,000 or more than 100 per cent. Our increase in valuation to the extent of about 1½ millions in 1912 was the result of a change in the basis of valuation to an appraisalment at full value. Assuming population has increased in the same proportion as Polls, Franklin should now have a population of about 7500. Assuming the number of polls to be a fair basis for estimating population, Franklin must yield the title of the baby city to Somersworth which in 1916 reports 1746 polls and Franklin 1897. Somersworth also reported a debt \$35,000 in excess and a valuation \$170,000 less than Franklin's.

Central Street Improvement.

Franklin has gained the distinction the past year, of having the finest looking and probably the most expensive main business street in New England, the credit for which must be conceded to the councils for 1916 and 1917. Whether it was wise to increase the city debt by \$36,000 to make these improvements all at once may be open to question. We must, however, admire the nerve of the men who did it. Although our debt is \$232,000 we own waterworks costing \$183,000 which could not be replaced today for the amount of the city debt. They are furnishing us the best of water at the lowest rates of any place of our size or larger in the state. The debt created by this highway improvement is placed in notes payable \$3000 each year. These should be paid at maturity and more if practicable.

Highways.

The general condition of the highways is better than usual in my opinion. While I am in favor of keeping them in good condition, I hope we may be able to reduce expenditures on them the coming year. I favor the completion of the state road to Hill. The purchase of a truck the past year for highway work seems to have been

wise. It should enable the city to keep a less number of horses than heretofore. I find it cost the city in 1916 over \$1800 for hay, grain, and blacksmith bills and medical attendance for horses. In addition to this two horses died. I recommend the Highway Committee to carefully consider whether a reduction in the number of horses is not advisable.

Since the liability of the city for accidents occurring on highways is limited to those occurring on bridges, culverts, and dangerous embankments, I repeat the necessity of watchfulness regarding such places not only by the Council and Highway Commissioner, but by all citizens as they travel and that such defects if noticed be reported at once to the Highway Committee or Highway Commissioner.

I also repeat the recommendation of Mayor Beaton, that as occasion may arise we place fixed bounds on our street lines. This is especially desirable where adjoining owners wish to make permanent improvements.

Fire Department.

I am not aware that this department will need any increased appropriation this year. Its efficiency has never been greater than the past year's, and the loss by fire has seldom been less.

I suggest, however, to the Committee on Fire Department and Chief Engineer to investigate whether or not money cannot be saved without loss of efficiency by having the fire truck now kept at the city stable kept at some garage, paying for a driver when called to fires and for necessary services in keeping the same in good condition. This seems more economical than the present arrangement to keep a man for that purpose with little else to do, especially as there is occasion to call out this truck but few times during the year.

Police Department.

The services of the officers of this department have been satisfactory so far as I have heard or observed. I notice an increase in expense of this department from \$2400 in 1914 to \$4000 in 1916. The figures for 1917 I

have not seen. This increase I understand, was largely due to the increase of force made necessary by the license law. As the city will return to prohibition conditions on May 1st, I see no reason why the City Marshal and one assistant, with specials to call on when necessary, should not take care of the business and expenses reduced to what they were three years ago.

A large part of the time of police officers is inevitably spent under our present system, in waiting or watching for violations of law which come very seldom. This is not the fault of the officers, but of the arrangement of the system. I think if we were hiring them to work for us individually we should find something else for them to do to occupy their spare time.

An officer in the police court room with occasional patrols of the street is easier to reach by a majority of people than if patrolling the streets all the time. It seems to me that a police officer, if properly selected, could for present salary, in addition serve either as tax collector, assessor, driver of motor fire truck, janitor of City Hall or school buildings. If serving as tax collector an arrangement should be made with the city clerk to act for him in his absence for which some extra compensation should be given. An officer might also be employed as clerk or proprietor of some store on Central street and be as accessible as now, instead of one of the positions named. I mention this, not in criticism of the officers but of the system under which they have been employed. I suggest investigation by the Council and postponement of election of police and tax collector for one month. The present officers continuing meantime.

Taxation and Assessors.

The law requires the valuation of property for taxation at its cash value. The courts hold the cash value of property is what it will sell for in cash at a fair public sale. There is no other test. Our assessors have fixed valuations on that basis since 1912 according to their

judgment. That no petitions for abatement have been filed in the Superior Court indicates the general fairness of their estimates. The value of real estate does not vary much from year to year, so that the work of assessors is much relieved. Sales of property should receive especial consideration yearly to test the accurateness of their valuation.

The City Charter fixes the salaries of assessors at \$50 each. Of late years little attention has been paid to this provision and \$175 each has been paid in addition to charges by the clerk for distributing inventories and keeping records of the Board and copying the assessment. The amount of work has not materially changed since 1895. Men should be selected for the office who have special knowledge as to values of property. The law does not require one to be selected from each ward and such a custom may lead to selection of inferior men. It is my belief that men can be selected who will serve for the original salary who are equally competent with the present board. We cannot tell if we do not try. I suggest that as Mr. Goss, the City Clerk, is so familiar with the business he be chosen as one, with the additional salary fixed. Also if difficult to find good men at the salary that we try the Highway Surveyor, Mr. Nowell, for another. I consider him one of the best judges of property valuation in the city. I have no reason to think the present assessors would not serve except Mr. Nevins, who does not care to continue.

Board of Health and Milk Inspection.

The inspection of milk is so closely associated with the duties of the Board of Health that the salary now paid to the Chairman of the Board of Health would seem sufficient to cover the duties pertaining to the duties of milk inspector. I therefore recommend that a salary of \$180 for the Chairman of the Board of Health include necessary services as milk inspector.

When we consider that Councilmen, Members of the Park Commission, Water Board, Library Trustees,

Trustees for Investment of Trust Funds and some other city officers have always served without any pay, the reduction in compensation of officers is reasonable.

The need of economy in the war crisis as set forth on all sides makes this an opportune time for reduction.

I know of no occasion to comment on other branches or departments of the city. When the city reports are issued I may desire to make some further suggestions.

I have complete confidence I can rely on your full support in giving our best efforts to an economical, businesslike, non partisan administration of the affairs of the city for the coming year.

HIGHWAY DEPARTMENT.

HIGHWAY COMMISSIONER'S REPORT.

To the Mayor and City Council of Franklin:

I herewith submit my report as Highway Commissioner for the year 1918:

The highway department has been handicapped during the past year by scarcity of help, and some necessary work was unavoidably left undone.

Although with a less number of men employed, the general expense appears to be somewhat greater than the previous year, the increase was principally due to an advance in wages amounting to about 30 per cent.

The efficiency of the department was materially increased during the past year by the purchase of 2 one-ton Republic auto trucks.

The purchase of the two auto trucks, and a carload of Tarvia B, the larger part of which remains unused, were not considered at the time of making the annual appropriations, and would account for nearly all of the overdraft shown in the financial report.

The following is an itemized account of the important repair work done during the year:

Tarvia B and sand were applied as follows:

1200 feet in length on Franklin St.

1800 feet in length on Prospect St.

1000 feet in length on Pleasant St.

300 feet in length on Cheney St.

2200 feet in length on South Main St.

400 feet in length on Depot St.

1700 feet in length on Central St.

800 feet in length on Webster St.

About 300 feet in length of the roadway on Memorial St., was spiked up, redressed with crushed stone and treated with Tarvia B and sand, 1800 feet on No. Main St., and 400 feet on Webster St., were similarly repaired.

A total of about 3,000 feet in length of dirt sidewalks on Bow, Franklin, Winnepesaukee, Railroad, Park, Webster and Sanborn streets were graded and covered with ashes.

Concrete Walks and Crossings.

During the year, 1850 square yards of concrete walk was newly constructed or recovered.

State Aid Construction.

Hill Road.

2,200 feet in length of finished gravel road was constructed the present year, completing the work to the Hill line. Future appropriations for State Aid Construction roads will be applied to the reconstruction of the principal highways leading from Franklin to the surrounding towns.

Trunk Line Construction.

Andover Road.

About 3,500 feet in length of finished gravel road was constructed the present year and it is expected that the remainder of the road to the Andover line will be completed the coming year.

JOHN E. CUNNINGHAM,
Clerk of Engineers.

Regulations of the Franklin Fire Department.

Adopted December 20, 1909.

Section 1. The fire department of the City of Franklin, shall be composed of a chief engineer, first assistant engineer, second assistant engineer, third assistant engineer, fourth assistant engineer, and a superintendent of fire alarms, who shall each be appointed by the city council; one steamer and hose company to consist of fifteen men, one hose company to consist of ten men and one hook and ladder company to consist of fifteen men.

Section 2. The chief engineer and four assistant engineers shall constitute a board of engineers and shall exercise the power of firewards.

Section 3. The chief engineer and each assistant engineer shall hold his office and perform his duties until his successor takes his oath of office.

Section 4. The City Council, for cause, after hearing, may remove from office the chief engineer or any assistant engineer.

Chief Engineer.

Section 5. The chief engineer shall have sole command over all persons present at fires whether members of the fire department or not.

Article 1. He shall direct all proper measures for extinguishing fires, protecting property, preserving order at fires, and enforcing laws, ordinances and regulations regarding fires.

Article 2. He shall have charge of and examine into the condition of all fire apparatus, fire alarm system, houses and all fire department property and shall cause needed repairs to be made under the direction of the committee on fire department of the City Council.

Article 3. He shall certify all pay rolls and bills against the department and shall be responsible for the care of all property connected with the fire department.

Article 4. In the absence of the chief engineer the next engineer in rank, who may be present, shall have the power to perform the duties of the chief engineer.

Board of Engineers.

Section 6. The board of engineers shall inspect and make themselves familiar with all shops, factories, hotels, tenement houses, public buildings, halls, churches and schoolhouses once a year, and study the location of all hydrants and generally inform themselves in all matters pertaining to their duties.

Article 1. They shall have control of all persons appointed to serve in any company of the fire department and shall have power to direct and control the labor of all persons present at a fire.

Article 2. They may from time to time make and enforce such regulations for the government of the department as they may deem proper.

Article 3. They may establish such regulations respecting public safety, kindling, guarding, safe keeping, prevention, and extinguishment of fires, and for the removal of combustibles from any place, and the keeping or storing of explosives, as they think expedient, which shall be signed by a major part of them, approved by the Council and recorded by the city clerk, and attested copies posted in two or more public places in the city thirty days before they shall take effect.

(a) Penalties not exceeding ten dollars for each offence may be prescribed for breach of such regulations and such regulations shall remain in force until altered or annulled.

Article 4. They shall examine the qualifications and fitness of all applicants for membership in the department

and no person, whose application has not been approved by a majority of the board of engineers shall become a member of the company.

Article 5. At the first meeting in each year, after the qualification of the engineers, they shall proceed to elect, by a majority vote, a clerk of the board of engineers, a captain, a lieutenant and a clerk for each company and an engineer, assistant engineer and stoker of the steamer, each of whom shall hold office until his successor is elected.

Article 6. Any member of any company may be dismissed from the department or from office in a company by two-thirds vote of the board present.

Article 7. They shall in conjunction with the annual report of the chief engineer, make recommendations as to the needs of the department.

Article 8. Every engineer shall cause any fire deemed by him to be dangerous, in any street or elsewhere to be extinguished or removed.

Superintendent of Fire Alarm.

Section 7. The fire alarm system shall be under the control of the chief engineer, with direct supervision by a superintendent of fire alarm who shall be elected by the Council.

Committee on Fire Department.

Section 8. The committee on fire department of the City Council, with the approval of the chief engineer and subject to direction by the Council shall purchase all supplies in connection with the department.

Article 1. They shall direct all repairs of the houses, fire alarm system, and fire apparatus.

Article 2. They in conjunction with the board of engineers shall hold meetings on the last Wednesday of each month.

Adopted December 5 and 19, 1910.

Amended May 20, 1918.

1. That the salary of the chief engineer be \$150 a year and 75 cents per hour for actual service at fires. It is understood under this arrangement that he shall not put in any time except for fires.

2. That the number of assistant engineers be reduced to two and that the salaries of each shall be \$50 per year and 75 cents per hour for actual service at fires. Also that two alternates from the regular force be appointed by the chief engineer on January 1, to serve in absence of the assistant engineer at a proportionate salary.

3. That the clerk of the Board of Engineers shall receive a salary of \$15 per year for his services.

4. That the members of the various companies shall each receive a salary of \$25 per year and 50 cents per hour for all services.

5. That the engineer of the steamer shall receive \$1.00 per hour for actual service at fires, 50 cents per hour for practice and for cleaning and repairing.

6. That the superintendent of fire alarm shall attend to all repairs on the fire alarm system. Under this head it is understood that he shall at all times keep the line clear, and for any work in this connection, including the cutting of trees or branches, he shall not receive any extra compensation. It is further understood that in instances that tappers are changed, it shall not be considered extra work except where new wiring is called for. That he shall attend to the winding of all the clocks and the tappers and he shall see to the procuring of supplies for the whole system, including the storage batteries at the Franklin Light & Power station, subject to the approval of the chief engineer and Fire Department Committee.

BOARD OF HEALTH.

The Board of Health has had a particularly strenuous year. The death rate has far exceeded any records we have, although the contagious diseases and child mortality have been small.

In the early fall the Spanish Influenza raged and many people died. A peculiar feature of the disease was that young robust people were stricken and succumbed far out of proportion to the very young or aged. Many lives were lost from lack of care and imprudence of the sufferers.

A practical demonstration of Red Cross service was given at this time and was a revelation to many who thought the society existed for the furtherance of local social meetings. At the beginning of the epidemic the Red Cross in conjunction with the Board of Health and City Fathers, opened an Emergency Hospital at Young's Hotel. The good it accomplished is well known and we speak from positive knowledge when we say "lives were saved." It cost a lot of money, but who measures human life with money? The Red Cross by its efficiency and willingness to meet all conditions, has gained an enviable reputation endorsed by everyone.

The water supply as reported by the State Laboratory, is fine and we recommend its use freely. It has been suggested that the Board of Water Commissioners allow 600 cubic feet instead of 500 per quarter. For obvious reasons we approve the recommendation.

The keeping of pigs under supervision was allowed in parts of the city otherwise forbidden. Financially it was a success and few complaints were received. We may allow it another year if the privilege is not abused.

The Mayor and City Council purchased a piece of land at Webster Lake District for a dump. It was approved by the State Board of Health and in time will change an unsightly bog into a portion of our Park System.

The schools are kept in a sanitary condition by their janitors and fumigated and cleaned often. The teachers are realizing that children who are beginning an illness are better off at home and are cooperating with us in an effort to keep disease from spreading. The parents are becoming more thoughtful of things that are known to be efficacious

and the literature being distributed by our Board upon the latest methods of the prevention of diseases are being well understood.

The milk situation is in a fair condition; not up to the standard we desire. A local scarcity and lack of help has made it hard for the farmer to keep up to the high standard we have set. We have kept the price lower than in some places and are in hopes that on a peace basis it will go still lower. The quality is good and most farmers are on the approved list.

ODELL MEMORIAL ARCH FUND.

Vote passed April 7, 1913,

That, The City of Franklin hereby accepts the sum of two thousand dollars given to said city March 3, 1913, by Mrs. Herman J. Odell, same to be known as the "Odell Memorial Arch Fund", and said city hereby contracts and agrees with the said Mrs. Herman J. Odell, her heirs and assigns, to pay four per cent. interest annually on said sum, said interest to be expended by duly authorized agents of said city for the following purposes only, to wit:

First. For the care and repair of the Odell Memorial Arch.

Second. For the lighting of said arch.

Third. Balance for the care of the Odell Park.

It is further voted that a copy of this vote of acceptance and contract shall be printed annually in the city reports.

Approved.

W. W. EDWARDS, Mayor.

CITY SOLICITOR'S REPORT

To the City Council of the City of Franklin:

The only cause of action now pending against the city, is that of Patrick L. Kennedy for assessment of damages to his property on Central street, which he claims as a result of the changes made when said street was rebuilt.

This petition was filed in the Superior Court for Merrimack County, after the council denied his petition heard by it on March 27th.

During the year I have advised with the various city officials and appeared before the local court when circumstances required, which has been seldom since the first of May.

Respectfully submitted,

THOMAS F. CLIFFORD,
City Solicitor.

CEMETERY TRUST FUNDS.

MARY J. COLBY FUND.

In the year of our Lord one thousand nine hundred and thirteen.

A resolution relating to the Mary J. Colby Fund.

Resolved by the City Council of the City of Franklin as follows:

Whereas, By the terms of the will of the late Mary J. Colby, the sum of ten thousand dollars has been given to the City of Franklin, N. H., in trust, the income to be used annually for the support of the poor of said city, and the principal to be known as the Mary J. Colby Fund:

Be it Resolved, That the City of Franklin, N. H., in accepting said trust fund hereby votes that same shall be deposited by the Treasurer of said city as follows, to wit: That the sum of five thousand dollars shall be deposited to the credit of the City of Franklin, in the Franklin Savings Bank of Franklin, N. H., and the sum of twenty-five hundred dollars shall be deposited to the credit of the City of Franklin in each of the following named banks, to wit: New Hampshire Savings Bank and Merrimack County Savings Bank, both of Concord, N. H., to be known as the Mary J. Colby Fund; and that the annual interest or dividends paid by said banks on said deposits shall be expended for the benefit of the poor of Franklin, N. H., by an agent who shall be elected by the City Council of said city of Franklin, for a term of one year, and that said agent shall annually make a return to said city of the names of the persons assisted and the amounts to each, but that said names shall not be included in the list of paupers, or published.

Approved.

W. W. EDWARDS, Mayor.

Passed September 8, 1913.

That part of the above resolution relating to "an agent who shall be elected by the City Council" was repealed September 13, 1915, and trustees appointed under provisions of Chapter 162, laws of 1915.

PARK COMMISSION.

PARK COMMISSION.

To the City Council of the City of Franklin:

One might suppose that our parks at least, would have remained untouched by the world conflict—and yet, the trail of the war-serpent has been over them all! At Odell Park even the sports and pastimes have not “carried on” as usual. There were few quiet and untroubled faces seeking intensive recreation in the eventful summer of 1918; there were service flags in many a window, and hundreds of azure stars were proudly worn in honor of Franklin's youth, who had heard the drum-beat, and had gone forth to the far-flung adventure. Even the Chautauqua Assembly, which, for the first time tented in our community, was advertised as “The War-Time Recreation”, and there was no number on its program which failed to inject a fervid appeal for patriotic service.

The gospel-virus of food conservation, too, inoculated the busy care-taker, Mr. Morrison. This gospel he expounded with practical logic, by the installation of a flock of hens and a pig in camouflaged quarters in the rear of the Lodge, not far from where the “greased pig” was wont to excite hilarity on sportive occasions.

During the year the city received formal conveyance of the Lodge and Rest bungalow from Mrs. Odell, and also a duplication of her previous donation of \$2,000 as a perpetual Memorial Arch and Cottage Fund.

Well-used wealth and well-used sentiment have wonderfully adorned and dignified this spot of natural scenic beauty. The Memorial Arch and the Cottage are complementary benefactions which, rightly used, should make this ten acre world “safe for democracy.” This sonorous phrase, however, applies only to law-respecting and law-abiding park frequenters. To wrong doers and wrong users these munificent gifts admonish and signify, “Thou shalt not pass.”

In Daniell Park there were several war gardens, strange anomalies on that sterile soil. With some misgivings your Commission in July, granted permission for a circus to exhibit on a restricted section of the tract. A few days later the horses of this traveling aggregation were commandeered by the Federal Government and the outfit was demobilized. Thus did the far-reaching exigencies of insatiate war follow closely on the heels of mirth and jollity!

The 7,000 pine transplants set out in the springs of 1914 and 1915, have added another annular record to their registries, and are now suggestive evergreen monuments to the recuperative forces of nature which have been silently reforesting the Sand Farm acres during the half a decade which has blasted and carnaged countless acres of another continent.

At Webster Lake much deforestation has taken place, as disclosed by your treasurer's fiscal report. All this has been accomplished without protests of dismay from an exasperated public. The stern logic of war events has had much to do with this change of sentiment. The matured oaks were imperatively needed for ship keels to bear costly cargoes on the high seas; the cord-wood fuel was essential to "keep the home fires burning." No cutting was permitted within one hundred feet of the Lake Highway. To minimize the fire-hazard and to eliminate unsightliness, the windrows of slash—the aftermath of timber slaughter—are to be carefully and seasonably destroyed.

The sum of \$1,000 has been placed at interest in Franklin Savings Bank, to be used eventually, it is hoped, in the establishment of public bath houses at the Lake.

There are still many acres of hard wood growth with a sprinkling of lofty pines on the north-east part of the reservation. On this tract was slain the pine of a hundred years, which, arrayed in a strange gloss, and a new glory, stands in exiled pomp opposite our Soldiers' Memorial Hall. From this majestic flag staff, in seasonable weather, float resplendent our National Emblem and our city's Service Flag with its dark blue star in which nest the three highly significant numerals.

FRANKLIN PUBLIC LIBRARY.

Chairman Trustees Franklin Public Library.
To the Trustees of the Public Library:

The year 1918 has proved the value of the Public Library, as has no other year in the past. Not only has the legitimate work of the circulation of books and magazines been carried on, but the building itself has been used to its utmost capacity throughout the year.

The hall has been a center of patriotic activity, being used for the exhibition of posters, for cooking and wool-saving demonstrations, for the publicity work of the Food Administrator, for an open forum where speakers from the League of National Defense could be given a hearing, for Liberty Bond committees, for farm demonstrations, for classes for the Red Cross and for many other meetings concerned with the carrying on of the war. This service was free to the public in every instance.

The Reference Room has been used as an office for the Red Cross, while the basement has been one of the busiest manufacturing places in Franklin, all the dressings and garments of the local Red Cross being made, packed and shipped from there. It would have been difficult to have found a place in Franklin where cooking, sewing, pressing, cataloging, filing and preserving records, lecturing, exhibiting and organizing, all could have been done in the same building. This has not interfered with the Reading Rooms or the use of books, but it is not surprising that such great activity in other lines should have reduced the circulation of volumes. People have been too busy to read books, the newspapers and magazines have contained matter of more vital interest.

This has not lessened the work of the library staff in the least, for every pound of yarn given out by the Red Cross to be knitted into garments for the soldiers and sailors, has gone over the library desk, the workers have been catalogued in true library style and finished garments have been credited to the knitters.

If the library circulation could be given in pounds of yarn, it would outdistance any record of previous years.

From September 23 to October 15 the library was closed for the circulation of books because of the Influenza epidemic, but the humane activities of the Red Cross never ceased, and much comfort was given the sick from garments made in the library basement. The following supplies were made for local use during the closed period: 20 bed shirts, 12 childrens' night gowns, 275 sanitary pads, 40 pneumonia jackets and 100 masks. No account was made of old linen, bedding and blankets which were collected and distributed from the building. The Diet Kitchen, so necessary during that stressful time, was planned in the Reading Room, and the Emergency Hospital started its efficient career from plans worked out in the building.

Literature sent out by the government for educating the people in food conservation and war gardens was distributed from the desk and reached a much greater number by this means.

Seven cases of books were collected and sent to soldiers and sailors. This accounts for the small number of gifts to the library itself. Only 57 volumes were given during the year. Books added by purchase numbered 441 volumes, while 27 bound volumes bring the accessions to 11,608 volumes.

The number of new borrowers added during the year was 316; there were many transients who were not registered.

TREASURER'S REPORT.

To the Trustees of the Franklin Public Library:

I hand you herewith my report as treasurer for 1918.

Increase in salaries of librarian, assistant librarian and janitor and unexpected repairs brought the running expenses of the library up to \$3,035.47. This amount includes the expenses of the branch library which were \$257.68. Various repairs required during the year amounted to \$236.22. I am glad to be able to report that

for the first time since the library was started the income available for the purchase of books was sufficient for our needs. The income from trust funds and from fines, rentals, etc., amounted to \$662.28, all of which is applied to the book fund. The total of our trust funds has, during the year, been generously augmented by the gift of investment securities amounting to \$2,500, by W. F., and George Ernest Duffy in memory of their father and mother, Michael and Mary Duffy.

To adequately provide for the running expenses of the library and the branch and to cover such repairs as may be required during the year will require an appropriation of \$3,100.

Respectfully,
W. F. DANIELL, Treasurer.

Franklin, N. H., Jan. 20, 1919.

To the Mayor and Members of the City Council:

I most respectfully submit herewith the reports of the Treasurer and Librarian of the Franklin Public Library.

Both of these reports deserve the unusual attention of all of our citizens. The work that has centered in and around our public library during the past year has been of untold value and it is especially pleasing to know that the financial conditions of the library at the end of the year were the best ever, due to the loyal support of the citizens as a whole as well as to some individuals.

The thanks of the whole city are due to those individuals who did so much to improve the library building primarily to make it a more fit place to carry on the work of the Red Cross and allied causes, but permanently to the betterment of the building itself.

The trustees beg to acknowledge a remembrance in the will of the late Mrs. Warren M. Draper in the form of a gift of \$1,000 which will at some later date accrue to the use of the library. A bequest to a library means an everlasting good to a community.

RATES.

All customers are supplied through meters. The minimum charge is six dollars per year, which entitles the consumer to 2,000 cubic feet during the year. Rentals are collected quarterly. For the first 1,000 feet or less in each quarter the charge is 30 cents per 100 feet; for the excess over 1,000 feet used each quarter, 20 cents per 100 feet is charged.

Upon all quarterly bills exceeding \$12.50, a discount of 25 per cent of the excess over \$12.50 is made.

No charge is made for private hydrants or for automatic sprinkler service.

The expenditure for repairs and extensions during the year has been less than usual so that out of the water rents it has been possible to pay \$4,000.00 upon the city water debt which now stands at \$96,000.00.

A comparison of the above tables shows an increased expenditure in many lines while an inspection of the tables which follow show to whom and for what purpose the money was paid out.

The unusual balance is due in part to the inability of purchasing the usual season's supply of coal for the Nesmith building.

School Accommodations.

Each year the congestion at the high school building increases and as has been noted in previous reports the district must soon face the problem of greater accommodations there. Every room in the building is used for almost every period of the day and when an extension of the high school work which we plan for, is adopted, our present facilities will be severely strained. Larger classes than are desirable and as recommended by the

state department are necessitated by this lack of room. This problem should be considered and plans made for meeting it.

During the summer a request was received from parents living at the head of Webster Lake asking that the school located in that district be reopened. A canvass of the neighborhood showed eleven pupils of school age and as nine of these would be beginners and their transportation to the Nesmith building would be a hardship, it was decided to re-open the school which was given the name of Webster Lake school. This solution of this problem is the most economical for the district and proves most satisfactory to the parents.

At the Golden Rule school the building is taxed to its capacity, twenty-eight pupils being now enrolled. If more boys are admitted to the Homes, greater school accommodations must be provided in that district.

There are ample accommodations at both the Nesmith and the Morrison buildings while at the Parker C. Hancock building the rooms are not over-large.

Repairs.

During the winter vacation of a year ago water level traps were installed at the high school and the Hancock buildings. The working of these traps has substantiated all that was claimed for them, namely a more equalized heat, the absence of condensed water "backing up" and the saving of much pounding in the pipes. The janitor of the heating plant stated that there was a pronounced difference in the amount of fuel required after the installing of these traps, placing the saving at nearly three-quarters of a ton of coal a day and believing that the traps paid for a large part of the expense of their installation the first year.

During the year no greater repairs were made than seemed necessary for the preservation of the buildings and for the health of the pupils. This was on account of the scarcity of labor and the high cost of all supplies. The bills for the repairs of the plumbing systems have been very large owing to the fact that the systems have

been in use for many years and are continually giving out now. Many of the pipes are found to be rapidly filling with rust now.

I would recommend that the Board adopt the policy of installing modern systems of plumbing in our school buildings and that a beginning be made this year by changing a portion of the sanitariums in the high school building. The Nesmith and the Webster Lake buildings need painting and the roof of the high school needs repairs.

Medical Inspection.

The annual physical examination of the pupils was not made during the past year owing to the fact that the School Physician was required to give his time to the work of the Local War Board in the examination of the drafted men. Foreseeing this, he made the examination usually held during the spring term in December, 1917, making two examinations held that year but receiving pay for the last examination in 1918. The very noticeable results of the work of Dr. Drake and of the "follow up" work by the school have been much missed this past year and I would recommend that this line of school health activity be resumed as early as possible.

Teachers.

I would recommend that the Board continue its policy of retaining its efficient teachers by the increasing of their salaries. During the past year there was not one of our teachers that did not have the opportunity of accepting tempting offers from the government or from other school authorities at a greater salary than we could offer. That they did not accept these offers is a matter of congratulation to the city and should and does merit the thanks of the parents.

The salaries paid here are yet too low for the services rendered and if we are to obtain and retain such teachers as we want, we must follow the example of other New Hampshire cities and towns in offering more pecuniary inducements.

War Work.

In the early part of the year, resignations were received from our sub-master of the high school and from the instructor of manual training, each of whom left to take up war work.

During the year the teachers and some high school pupils have assisted in copying and indexing questionnaires for the War Board while during the recent epidemic every teacher here and very many pupils worked untiringly to help stamp out the disease.

The Junior Red Cross has made sixty-four articles of clothing for the children of Belgium and France beside many thousand of gun wipes, four afghans and one quilt paying for these supplies with money raised in various ways. The girls of the domestic arts classes have done much war work in canning, preserving and the drying of fruits as noted in the special report of that department.

Almost four hundred pupils carried through war gardens, harvesting crops estimated at over three thousand dollars in value. Several thousand dollars value in bonds were purchased by our pupils while war saving stamps and thrift stamps valued at \$4,954.50 were purchased by our pupils during the year. All in all I believe that it may be truthfully said that our teachers and pupils have each done "his bit."

Evening Schools.

Sessions of the evening schools were held in the Library Hall during the winter months of last year and were resumed in November in the high school building.

Our present work is confined to the teaching of the reading, writing and the speaking of the English language with one class of advanced work in English. The enrollment for the present year is fifty-one with an average attendance of about forty. Several who were enrolled have since left the city. Our enrollment should be two or three times its present number and the superintendent would welcome any suggestions and any help which will secure greater membership. It is believed

that a fair trial of evening school work will prove to our "coming Americans" that we desire to and can help them.

Commercial Course.

I cannot too strongly repeat my recommendation of a year ago that such a course be adopted for the coming year.

We have some fifteen young people who now attend schools outside the city in order that they may gain a business education, entailing great expense and much inconvenience upon these pupils.

I believe it possible to give our pupils a good practical business education here and I fully believe that the adoption of such a course will do much to build up our high school in numbers and in its practical value to the city. That the graduates of such a course are in demand has been evident continually during the past year when not a typist or bookkeeper could be found who was available for new openings.

Junior High School.

If we are to keep in line with the progressive towns and cities of our state we shall adopt this new phase of school work which has now been thoroughly tried out and its value proven. I believe that by giving this matter our early attention we can be ready to inaugurate this new plan at the opening of another school year.

Conclusion.

The work of the past year has been very much interrupted by the loss and changing of teachers, the sickness of teachers and of pupils, the closing of the schools and the demands of various war activities. It is to be hoped that the present year may permit more unbroken work and with the hoped-for broadening of our courses of study that another year may find us having made more distinct progress.

In conclusion I would thank all who have aided in the school work of the past year, both teachers, pupils, parents and members of the School Board.

Respectfully submitted,

GEORGE A. KEITH,

Superintendent of Schools.

HIGH SHOOOL REPORT.

Mr. George A. Keith, Superintendent of Schools:

Numbers.

In last year's report it was stated that the war had not noticeably affected the attendance of the school. The enrollment of last year, 226, was practically the same as the year before. But within a year, including those who did not return after the summer vacation, more pupils than usual have left, so that the enrollment has now been reduced to 203. In 1915 the enrollment was 239, the largest the school ever had. Two hundred and three is less than 239 by 15 per cent, which percentage may fairly be taken to represent the loss in membership due to the war.

A large majority of those who left went to work, as wages have been attractive and living expenses high. Also, a larger percentage than usual left the city.

This loss is not so much as feared might occur. Perhaps, indeed, the pendulum has not yet begun to swing the other way. In any case now is the time to consider how we can regain our numbers; for, all communities like to have their high schools well attended. Large membership is secured by having and retaining efficient and faithful teachers; it is also done by having courses that are attractive to pupils and parents.

Courses.

There is another good reason why the courses of our school should be carefully considered at this time. This is because the last of the five-year pupils will be graduated this coming June. Then the school will be fully organized upon a four-year basis. Now is the opportune occasion to make plans, if we are to have in Franklin a junior high school, or if we are to introduce new courses or extend old ones.

We have two full departments, which are called the academic and classical. In the academic department there are courses in manual arts, domestic arts, and in bookkeeping. But there are not enough of these branches to place them in separate curricula or depart-

ments. Boys of the freshman and sophomore classes take manual arts, but no juniors or seniors. Studies in domestic arts are taken by freshman, junior and senior girls. This is an extension over previous years and puts us in a way easily to make a full department of the domestic arts.

The question ought to be definitely asked whether a commercial department should be started at this time. This is desired by a considerable number of pupils and parents. Our graduates go away to business schools and other pupils leave school to take up such studies. If commercial courses were unusual, the argument would be different; but there are very few schools in the country the size of ours that do not teach the use of the typewriter.

But it should be remembered that any curriculum of a high school that leads to a diploma is valuable. A diploma should be prized as something worth securing.

It is to be hoped, too, that in the not distant future it will be possible to give systematic physical training to both the boys and the girls. The physical examinations of men for the army and navy have disclosed so many preventable defects that there is a general movement in the country for more physical training of pupils in the schools.

War Activities.

The school has continued to do its bit for the war. During the summer nearly all of the boys either had gardens or worked at some needed occupation. Girls have done similarly, but not in so large a proportion. But they have helped in other ways, such as by raising funds, by sewing, and by being serviceable during the influenza. The "Victory Girls," among whom are some from the eighth grade of the Falls school, pledged themselves to earn and give to the united war fund \$134. "Victory Boys" in like manner agreed to earn and give \$166.50. Pupils own war savings and thrift stamps to the value of \$1,604. The liberty bonds in their name are worth \$7,700.

President Wilson called upon teachers to assist local boards in recording facts concerning registrants. As

there was such a board in Franklin, the teachers of the high school together with the others gave much valuable time for this purpose.

Mr. Adams, the instructor in manual training, left to train men in shipbuilding. He was stationed in Virginia, at Hog Island, and in California. Mr. Douglass, the sub-master, went into the navy and after some training on land and sea found a place for his ability in mathematics as instructor in a school for naval officers in New York City.

The following names of former pupils of the school who have been in the service of the government should be added to those printed in the report last year: Kenrick Bean, Irving C. Brown, Jr., Guy Buswell, Frank Butler, Herbert Carbonneau, Everett Chase, Francis Claffey, Elbery Clark, Raymond Clifton, W. Guy Colby, Raymond Colby, Andrew Connors, Guy Cross, Perley Cross, Eugene Cunningham, Leon Dearborn, Fred Durham, George Emerson, Leon Flanders, Jeremiah E. REPORT OF THE SUPERVISOR OF MUSIC.

Mr. George A. Keith, Superintendent of Schools:

I herewith submit my second report. For the past year the regular course of study has been followed. In spite of the many absences due to illness during the Fall term many of our classes have done excellent work in music.

The new supplemental books, Baldwin's Progressive Melodies for the lower grades and the Silver Song Series for the sixth grades have proved very helpful. Supplemental material is needed for the seventh and eighth grades. I know of nothing better for these grades than the Silver Song Series, numbers seven and eight.

Even though we insist upon thorough drilling of the fundamentals of music we try to keep in mind the suggestion made by a supervisor of experience: "If you can get only one thing done in your fifteen minutes per day, let that one thing be getting your pupils to sing and to love to sing."

In addition to singing, the boys and girls need to form habits of listening to music. The teaching of music appreciation should be begun in the grades. For the teaching of this subject in our own schools more Victrola records are needed. It is impossible to do much along this line without the use of such records.

The high school chorus during the winter term will work on the two cantatas "Columbus" by Hosmer and "The Wreck of the Hesperus" by Anderton. We are about to organize a glee club of mixed voices in the school.

Since my last report the orchestra has increased in numbers as well as interest and at present numbers twelve with weekly rehearsals.

The following paragraph taken from "School Music" shows one of the aims of our public school music: "We are training boys and girls to use their hands so that their working hours may be spent with profit to themselves and to the community; let us not forget to teach them how to use their hours of leisure well also, so that the life of the community may be helped and not hurt by their play and so that they themselves may become ennobled and not degraded by their recreation.

Respectfully submitted,

MABEL F. BAILEY,

Supervisor of Music.

REPORT OF THE INSTRUCTOR IN DOMESTIC ARTS.

Mr. George A. Keith, Superintendent of Schools:

I herewith submit my first report as teacher of Domestic Arts in the Franklin schools.

The girls in the sixth grades have made sewing bags, aprons and Christmas problems. In the seventh grades the girls have made knitting bags, bungalow aprons and underwear and in this grade the girls have cut from patterns and have learned to run the sewing machines.

The eighth grades alternate cooking and sewing each week. They canned apples, made jelly and have served one meal. They have made bags, underwear and aprons in sewing.

The Freshmen girls spent the first part of the term in canning and preserving, all of this work being done in filling orders. Grape, quince and apple jelly, grape and apple conserve, piccalilli, gingered apple, catsup, apple butter and mince meat were made. They also canned tomatoes, swiss chard, pumpkins, squash, peaches, quinces and pears. In addition the class has prepared and served four meals. They have also made pies, cakes, cookies and other articles in filling orders. In sewing they have made underwear, towels, aprons and bags.

A new course, Household Organization, is being taught this year in the Junior class. This involves getting the home organized and in shape to run. Each girl has planned a house and then equipped and furnished it.

Respectfully submitted,

MARGUERITE HOPKINS,

Instructor of Domestic Arts.

REPORT OF THE INSTRUCTOR OF MANUAL TRAINING.

Mr. Geo. A. Keith, Superintendent of Schools:

I herewith submit my first annual report as supervisor of our manual training department.

As an introduction I would like to give my version as to what manual training should mean in the public schools. Many have the wrong conception as to the

advantage of manual training and suppose that boys leaving this department are ready to launch upon a trade. For those boys who follow the course through the sophomore class it offers a preparation for them to enter one of the numerous trade schools that are opening up each year all over the country just as any high school course prepares any student to take up the studies of a profession in a college.

As for the training received by the boys of the sixth, seventh and eighth grades, manual training has a much broader meaning than when taken literally. Manual comes from the Latin "manus" meaning hand, therefore one naturally thinks of manual training as the training of the hands but it is more than that. It trains the mind also through the hands as well as the hands themselves. It is easy to see where these traits such as carefulness, neatness, accuracy, ability to save time and material, ability to think and to do and because of this thinking, honesty, which are emphasized in the manual training work may be utilized in all walks of life. The time is too short to accomplish great results in woodworking as the time allotted to these three grades during the three years is scarcely ninety hours.

Nearly one hundred boys come under my supervision during each week, only nine of these coming from the high school. I hope to make the work in the high school sufficiently attractive as well as instructive as to induce more of our high school boys to take this course.

The time this past term has been short but with few exceptions the pupils of the grades have completed their allotted problem and with the new year will take up a more advanced work.

In the high school, taborets, a hall-tree, a library table, victrola stands, towel racks, a dog house and pedestals have been completed. Besides these the boys have done considerable repairing about the building.

I would recommend that a new circular saw be purchased as the one we have is scarcely adequate for our needs; a new planer would also be an asset. I would recommend that more time be given to the work of the grades; one hour a week for the sixth grade is sufficient but the seventh should have two hours and the eighth

grade should have three hours at least each week. I believe that the results of such a schedule would prove it worth while.

In closing I wish to thank all with whom my work is associated for their hearty cooperation.

Respectfully submitted,

LINDOL R. WATERMAN,

Instructor in Manual Training.

REPORT OF THE SUPERVISOR OF DRAWING.

To the Superintendent and the School Board of Franklin:

The difference in character between militant Europe and the allied nations especially America, is the result of the educational system.

In the trade competition, soon to absorb the energies of the world, decisions will be dependent to a very important degree upon the beauty of things made. The result will be the awakening of a desire to do things beautifully with less tolerance for the crude. No longer may we be content to produce in quantity, only practical articles, and get beautiful things elsewhere. Neither may we remain an industrial country, with so little industrial art.

Realizing this, the importance of cultivating an increased aesthetic appreciation may not be overlooked. This relates in no small way to manual arts in the public schools. Admitting this, we must deprecate the fact, nevertheless, that drawing in our own schools, is for lack of time, rather pushed into the background. Who would undertake to teach music or any other elementary subject, in the forty-five minutes a week assigned this?

Previous to the spring of 1918, we devoted some time to fundamental, if more prosaic, routine. This sufficiently improved the class work, as well as raising the standard, to endorse it. Some excellent free brush work in the high school and the grades resulted.

This fall we attempted, though necessarily hampered by existing conditions, to make careful detail, and constructive drawings of plant forms.

Following this, some of the things designed were pen-wipers, boxes, calendars, desk blotters and gift cards expressing the spirit of the season.

The ensuing work will be similar to that outlined last year. The time allowed then, for design in the upper grades and high school was extended while we worked very strenuously on war posters. It was the opinion of other competent judges that these compared very favorably with others submitted in the state.

A set of plates to be blueprinted, correlating with manual training, was made by the freshmen.

Lettering and the general interest has improved. I wish to thank those grade teachers, who through their interest and thoughtful cooperation have materially aided.

Most respectfully submitted,

ALICE PARKER KILLAM.

ORDINANCES.

Relating to Sewers.

Be it ordained by the City Council of the City of Franklin as follows:

Section 1. That the resolution of the City Council adopted May 10, 1895, relating to sewers, be, and the same hereby is, so far modified as to provide for a special assessment or charge only on such persons or corporations as have already, or may hereafter, connect with the new system of sewerage.

Sec. 2. That no person or corporation shall be required to connect with any sewer except by direction of the Board of Health of the city or the City Council.

Sec. 3. All persons who have already, or shall hereafter connect with the new system of sewerage, shall pay to the city the following sums, to wit: For each tenement of seven rooms or less, fifteen dollars; for each additional room in a tenement in excess of seven, two dollars.

Space in buildings occupied wholly or in part for stores, manufacturing, or other purposes than private barns, cellars and store houses or store rooms, or out-buildings, shall be reckoned and paid for on the basis of one hundred and fifty square feet of floor space as one room when connected with the sewer.

Sec. 4. All persons who have already connected with the new system of sewerage shall pay to the City Clerk the amounts for which they are liable under the provisions of Section three within thirty days after the passage of this ordinance, with interest thereafter, and the City Clerk is hereby directed to collect the same.

Sec. 5. No person shall hereafter connect with any public sewer without first obtaining a permit therefor signed by the City Clerk and countersigned by the High-

way Agent, and before such permit is issued to connect with the new system of sewerage such person shall pay to the City Clerk the sums for which he would be liable under the provisions of Section three.

Sec. 6. In any case where connection with a sewer is made by the Board of Health, through the neglect or refusal of the owner to comply with their orders so to do, the amount provided to be paid therefor in Section three shall become at once due and payable and collected by the City Clerk, but the City Clerk may issue a permit in such cases without prepayment.

Sec. 7. Every permit to connect with any public sewer issued by the City Clerk shall contain the name of the owner, the number of tenements and rooms in each for which the permit is granted, the location of the tenements and amount paid for such permit, a record of which shall be made by the City Clerk in a book kept for that purpose.

Sec. 8. All connections with any public sewer shall hereafter be made under the supervision of the Highway Agent and in accordance with his directions, and it is hereby made the duty of the Highway Agent to see that all such connections are securely made and in the safest and best manner and that only proper pipe and other materials are used.

Sec. 9. No person or corporation shall deposit any garbage, offal, filth or any substance having a tendency to obstruct the flow of sewage in any manhole, flush tank or sewer opening.

Sec. 10. All fixtures connected with private sewers leading to the public sewers shall be provided with suitable traps and strainers to prevent the introduction of all solids or anything that would obstruct the flow in the pipes.

Sec. 11. Any person violating the provisions of Sections five and eight, nine and ten of this ordinance shall be fined not less than twenty dollars.

Sec. 12. This ordinance shall take effect upon its passage.

Approved. E. H. STURTEVANT, *Mayor*.

Approved.

RUFUS G. BURLEIGH, Mayor.

Passed December 3, 1900.

Relating to the Names of Streets and Their Numbers.

Be it ordained by the City Council of the City of Franklin as follows:

Section 1. That the names of the streets of the city of Franklin shall be as indicated on the map in the annual report of the city of Franklin, of 1895, with addition of new streets and avenues since laid out, with the following exceptions: That the southern section of Pemigewasset street, running east from North Main street, shall be known as Gerrish street. That the street running from Depot street to Franklin Heights shall be known as Summit street. That the street leading north from Summit street to Pleasant Valley shall be known as Valley street. That the street west of Valley street, leading south from Summit street, shall be known as Gilman street. That the street running north from Central street near Republican bridge, to Cate brook, shall be known as Glenwood avenue. That the street running northwest from Bow street over Cheney hill to Glenwood avenue shall be known as Cheney street. That the street running west from Bow street past what is known as Davis' block to Glenwood avenue, shall be known as Glen street. That the section of Maple street, running north from foot of Willow hill, then east to that section of Maple street running north, shall be known as Willow Street. That the section of Winnipiseogee street running south from Central street to that section running east, shall be known as River street. The street running east, then

north from Franklin street, opposite Church street shall be known as Ayles court. That the section of High street east of the Franklin & Tilton R. R., shall be known as East High street and that section west of said railroad shall be known as West High street. That the street running east from Memorial street to Smith street shall be known as Canal street. That the name of Peabody avenue shall be changed to Peabody place. That the name of Railroad avenue shall be changed to Railroad street.

Sec. 2. The Mayor and Council shall from time to time, as the convenience of the public may require, designate the numbers to be affixed to the buildings on the several streets and squares in the city, and shall designate the names of new streets when laid out. In all streets the odd numbers shall be on the right hand side, and the even numbers on the left hand side of the streets in the progressive order of numbering, commencing with the lowest numbers and proceeding therefrom with increasing numbers as follows: The numbering of North Main street shall commence at the southerly end at junction of Central and South Main streets. The numbering of all streets connecting with North Main shall commence at North Main street. The numbering of South Main street shall commence at the northerly end at junction of Central and North Main streets. All streets connecting with South Main shall commence numbering at South Main street. The numbering of Summit, Wells and Salisbury streets shall commence at Depot street. The numbering of Valley and Gilman streets shall commence at Summit street. The numbering of Central street shall commence at the westerly end at junction of North and South Main streets. Sec. 3. Every entrance to a building fronting the street shall be designated by a separate number. In the residential portion of the city every lot with a twenty-five-foot front shall be designated with a separate number, and in the business portion of the city every lot with a twelve and one-half foot front shall be designated with a separate number. The business portion of the city is embraced within the following limits: North and South Main streets, between Webster and Depot streets, Central street between River street on the west and Bow street on the east, Smith, Canal, Memorial and Church streets and Franklin street from Central to School streets.

Sec. 4. Any person who shall affix or suffer to be affixed to or shall allow to remain upon any building, any different number from the one designated by the Mayor and Council, shall be fined not less than one or more than five dollars, and a like penalty for every day he shall suffer such building to be so numbered after his first conviction of violating the provisions of this section.

Sec. 5. That measurement of each street in the city shall be made according to provisions of section three of this ordinance, determining the correct number of every entrance as provided for in section three of this ordinance, and that a correct record of same shall be kept on file in the office of the City Clerk in a convenient manner for the reasonable use of the public at all times. That there shall be transmitted by the person authorized by the committee on ordinances to make said survey, a notice and statement giving name of the street, the name of the owner, the name of the occupant, and the number of the building, together with instructions for procuring and fixing same.

Sec. 6. That the owner of the property shall within sixty days after receiving said notice as per section five of this ordinance, cause to be affixed to every entrance of a building fronting the street, mentioned in said notice, a metallic or other suitable number at least two inches in height, and so situated as to be plainly visible at all times from the street.

Sec. 7. If the owner of any building, after receiving said notice as per section five of this ordinance, fails to comply with the provisions of section six of this ordinance, the said owner shall be fined not less than one or more than five dollars, and a like penalty for every day which the said owner shall neglect so to do after his first conviction.

Sec. 8. This ordinance shall take effect on its passage.

Relating to the Inspection, Sale and Care of Milk, Skim-milk and Cream, and the Premises Connected Therewith.

In the year of our Lord, one thousand nine hundred and fourteen.

Be it ordained by the City Council of the City of Franklin as follows:

Section 1. That the provisions of Chapter 127 of the Public Statutes, as amended by Chapter 107 of the Session Laws of 1901, relating to the inspection of milk, and amendments thereto, are hereby adopted, to be in force in the City of Franklin.

Section 2. The condition under which every cow is kept whose milk is sold or exposed for sale in the City of Franklin shall be made known to the board of health, if said board shall deem it necessary.

Section 3. No milk shall be sold or offered for sale unless the cow is free from disease and said board of health or any inspector appointed by said board may at any time examine any cow and the premises where same is kept.

Section 4. No milk shall be sold, offered for sale, or distributed in the City of Franklin which was drawn from cows within thirty days before or five days after parturition.

Section 5. No milk kept for sale or distribution shall be stored, strained, cooled or mixed in any barn or room used in whole or in part for sleeping purposes or for the stabling of horses, cows, or other animals or for the storage of manure, offal or other offensive matter.

Section 6. All rooms in which milk is stored, strained,

cooled or mixed shall be kept constantly clean, and provision made for the exclusion of dust and flies, to the satisfaction of the board of health. Proper apparatus shall be provided for washing and sterilizing all utensils used in handling milk and such utensils shall be washed with boiling water or sterilized by steam after being so used.

Section 7. No urinal, water closet or privy shall be located in the rooms mentioned in the preceding sections or so situated as to pollute the atmosphere of said rooms.

Section 8. All milk produced for the purpose of sale shall be strained and cooled as soon as it is drawn from the cow.

Section 9. No person, firm, association or corporation shall sell or offer, expose or keep for sale, in any vehicle, shop, store or other place where goods and merchandise are sold, milk, skim-milk or cream, unless the same is sold, or offered, exposed or kept for sale, in tightly closed or capped bottles or receptacles which have been approved by the board of health of said city.

Section 10. Milk kept for sale shall at all times register on test a temperature not higher than 55 degrees Fahrenheit, and shall be stored in a covered cooler, box or refrigerator.

Section 11. All cans, bottles or other vessels of any kind used in the sale and handling of milk shall be cleaned and sterilized before they are used again for the same purpose. No bottles or other vessels shall be filled except at the dairy or creamery.

Section 12. No one shall use a milk vessel as a container for any substance other than milk.

Section 13. All wagons, sleighs or any other vehicles used in conveying milk, cream or skim-milk for distribution or sale or collecting from raisers, shall be covered or kept in a clean condition, free from odors, and swill or any other refuse or decaying vegetable or animal matter shall not be carried on said wagon, sleigh or other vehicle.

Section 14. Immediately on the occurrence of any case or cases of infectious or contagious disease, either in himself or in his family, or among his or its employees or their immediate associates, or within the building or premises where milk is stored, sold or distributed, the

proprietor or manager shall notify the board of health, and at the the same time shall suspend the sale of milk or cream, until authorized to resume the same by the board of health of said Franklin.

Section 15. No person having an infectious or contagious disease, or having recently been in contact with a person having an infectious or contagious disease shall milk or handle cows, measures or other vessels used for milk intended for sale, or in any way take part or assist in handling milk intended for sale until all danger of communicating such disease to other persons shall have passed, and so certified to by the board of health.

Section 16. No vessels which have been handled by persons suffering from an infectious or contagious disease shall be used to hold or convey milk until they have been thoroughly sterilized.

Section 17. No bottle, vessel or receptacle used for the reception or storage of milk shall be removed from a private house, apartment or tenement wherein a person has an infectious or contagious disease except by consent of the board of health.

Section 18. No person, by himself, or by his servant or agent or as the servant or agent of any other person, firm, association or corporation shall bring into the City of Franklin for the purpose of sale, exchange or delivery, or sell, exchange or deliver any milk, skimmed milk or cream which contains more than 500,000 bacteria per cubic centimeter, or which has a temperature higher than 55 degrees Fahrenheit.

Section 19. The board of health shall keep a record of all inspections made under or by virtue of this ordinance and of the results of such inspections; and shall make a report each month to the City Council showing all inspections made, and the results of such inspections during the preceding month.

Section 20. The board of health of the City of Franklin shall make such order, rule or regulation as it may deem necessary for the compliance with the terms and spirit of this ordinance, and may appoint an inspector whose duties shall be to cause the enforcement of the provisions of this ordinance, and whose salary or compensation shall be fixed and determined by the City Council of said Franklin.

Section 21. Any person, firm, association or corporation, who shall violate or cause to be violated, by agent or otherwise, any provision of this ordinance, or any order, rule or regulation, made by the board of health under the authority of this ordinance, shall upon conviction thereof, before any court of competent jurisdiction be fined the sum of ten dollars, with costs of prosecution, for each offense, except in cases where the punishment is provided by the laws of the State of New Hampshire or the United States, in which cases the penalty so prescribed shall be imposed.

Section 22. This ordinance shall take effect June 1, 1914.

Approved.

Relating to the Regulating of Street Traffic.

In the Year of our Lord one thousand nine hundred and fifteen.

Be it ordained by the City Council of the City of Franklin, as follows:

Section 1. The word "vehicle" herein shall include horses hitched to vehicles, horses ridden or led, motor vehicles of all kinds, bicycles, tricycles propelled by hand, and everything on wheels or runners except light carriages for the conveyance of children.

Section 2. The word "horse" herein shall include all domestic animals.

Section 3. The word "driver" herein shall include the rider or driver of a horse, the rider of wheels and the operator of a motor vehicle.

Section 4. No person shall drive or operate any motor vehicle upon any highway of the city unless he be licensed so to do and said motor vehicle be registered as required by law.

Section 5. Drivers of all vehicles of every description shall keep to the right hand of the center of the streets, and in the compact part of the city shall drive at a rate of speed that is safe and reasonable.

Section 6. No vehicle shall stop with its left side to the curb on Central Street between the Republican Bridge, so called, and the Sanborn Bridge, so called, or on Main Street

between the Kenrick residence and Brown's Hill, so called, or on Franklin Street between Central Street and School Street.

Section 7. When a horse drawn vehicle is backed up to the curb, the horse or horses shall be turned so as to stand as nearly parallel with the sidewalk as possible and they shall be headed in the general direction of travel for the side of the street on which the vehicle is standing.

Section 8. Unless in an emergency or to allow another vehicle to cross its path, no vehicle shall stop in any public street or highway of this city except close to the curb line.

Section 9. (Extract from Motor Vehicle Law, Laws, 1911, Chapter 133, section 12.) Upon approaching any intersecting way or a curve or corner in a way every person operating a motor vehicle shall slow down and give timely signal, with his bell, horn or other device for signalling; provided, that in the thickly settled parts of a city or town, no bell, horn or other device for signalling shall be sounded so as to make an unreasonable noise, except in the case of fire and police department vehicles; and provided further, that no operator or chauffeur of any motor vehicle shall in any way permit any unreasonable amount of smoke to escape from said motor vehicle, nor shall any operator or chauffeur in any way permit said motor vehicle to make any unnecessary noise, by cutting out the muffler, or otherwise.

Section 10. No vehicle shall be allowed to stand within five feet of a fire hydrant.

Section 11. A vehicle turning to the left into another street shall pass to the right of and beyond the street's intersection before turning.

Section 12. A vehicle crossing from one side of the street to the other shall do so by turning to the left so as to head in the same direction as the traffic on that side of the street and shall not make the turn at a street intersection.

Section 13. Every driver of a vehicle shall, in slowing up or stopping, give a signal to those behind by raising a whip or hand vertically.

Section 14. In turning while in motion or in starting to turn from a standstill, a signal shall be given by the driver of the vehicle about to be turned by raising a whip or hand indicating the direction in which the turn is to be made.

Section 15. Vehicles must stop so as not to interfere

with or prevent the passage of pedestrians at crossings.

Section 16. Except as otherwise provided in the Motor Vehicle Law of the state, any person violating any of the provisions herein contained shall be liable to a penalty of ten dollars.

Section 17. It shall be the duty of the City Marshal, night watchman and police officers of the city to enforce all automobile laws and highway laws relating to travel thereon of the state, and to enforce the provisions of this ordinance by prosecutions for all violations.

Section 18. All ordinances inconsistent herewith are hereby repealed, and this ordinance shall take effect upon its passage.

"DANIELL SCHOLARSHIP."

In the year of our Lord one thousand nine hundred and fourteen.

A resolution relating to the "Daniell Scholarship."

Resolved by the City Council of the City of Franklin as follows:

Whereas, Jere R. Daniell of New London, Connecticut, on the second day of April, 1914, by his written communication of that date, addressed to the Mayor and Council of the City of Franklin, expressed his intention of establishing a free scholarship for graduates of the Franklin High School to the Massachusetts Institute of Technology, in memory of his father, the late Warren F. Daniell, and to be known as the "Daniell Scholarship," and together with his letter of the 16th of May, 1914, in which he agreed to give the sum of two hundred and fifty dollars each and every year, hereafter, beginning September 1st, 1914, to cover the costs of tuition for one student for four years in any one of the courses described in the catalogue of the Institute, and,

That a student to be awarded this scholarship, in whole or in part, must comply with the following named conditions:

First. He must have completed four years' satisfactory work at the Franklin High School.

Second. His parents or parent must reside in Franklin and be unable without undue deprivation, to pay the tuition required themselves.

Third. He must show during his four years' work at the High school, marked ability in some one of the several subjects covered by the Institute courses.

In case several candidates present themselves in any one year, the scholarship will be awarded by competition in the entrance examinations for the Institute. The candidate entering with highest standing to receive the award.

A holder of the scholarship will be expected to maintain the same standard of work at the Institute as that required of holders of regular Insti-

tute scholarships and the scholarship will be withdrawn in case the work is unsatisfactory.

The right is reserved to divide the amount of the scholarship among several applicants should such action seem desirable.

Be it resolved, That the City of Franklin fully appreciates the spirit that prompted Mr. Daniell to establish this scholarship for the benefit of the young men of said city, thereby creating an additional incentive for higher educational advantages in those who through misfortune or adversity would otherwise be prevented from obtaining the same; and,

Be it further resolved, That said City willingly accepts said trust, and does hereby direct that the annual payment of the sum of two hundred and fifty dollars shall be made to the City Treasurer, who shall pay the annual tuition of said student or students upon the presentation of the bill for same by the Bureau of the Institute, and,

Be it further resolved, That a permanent Committee on Scholarship shall be established to consist of the Chairman of the Board of Education, the Superintendent of Schools and the Principal of the High School of said City of Franklin, and,

Be it further resolved, That this resolution shall annually be printed in the reports of said city.

Approved.

W. W. EDWARDS, *Mayor*.

SERVICE LIST

SERVICE LIST.

Men Who Have Entered U. S. Service From Franklin.

The committee appointed by Mayor Leach to make a permanent record of the men and women of Franklin, who have been in the service, has prepared the following list of names. Any person who can suggest additions or corrections is asked to give the information as soon as convenient to a member of the committee, Rodney A. Griffin, Harry P. Swett or Harry W. Gilchrist. It is the intention of the committee to publish a complete record of each man and woman in a later report.
